

CAREER OR LIFE PATH INSIGHT

I have gotten a number of requests to comment on what is going on astrologically up there right now which really means down here because we are all out there in space in reality. Earth is traveling at 65,000 miles per hour in its orbit around the Sun, so I would say we are not moving slow.

To sum up what is happening now, the key notion is all about the mind and the path, call it career, vocation, life-path, or what-have-you? In astrology this is the planet Jupiter, which for each of us is how we manage to navigate the obstacles and terrain of life, therefore: the Life Path.

Anyway... that life path or direction gets a boost or shot in the arm right now, if not actually physically then mentally as in: new ideas or new approach to the life path and how we go through life, the 'way' we go. 'How' we go is the 'way' we go.

Be prepared for some unusual but very practical ideas (if not an actual event) that is career (or hobby) related. Your efforts pay off.
